About SMART4NZEB

The **SMART4NZEB** project is co-funded by the EU's COSME programme, under Grant Agreement no. 874425. Our project seeks to strengthen the capacity of five clusters (pRO-nZEB, PRO-Akademia, PSDiK, SGG, DUNDJER) from four countries (Romania, Poland, Slovenia and Serbia) - these clusters focus on the construction sector, energy efficiency and / or energy from renewable sources and are active in Central and Eastern Europe with the scope of increasing the performance of the built environment and fostering a better local and regional collaboration between stakeholders that are relevant and play an important role in implementing new requirements for qualitative building solutions and energy performance in buildings, such as the relatively new nearly-Zero Energy Buildings standards.

About DUNDJER (Host Organisation)

Construction cluster DUNDJER is a national cluster of Serbia, located in Nis, and established in 2008. with the main objective to improve construction sector in South-east Serbia and prepare it for EU market. DUNDJER gathers over 50 members of which 6 are faculties, 2 R&D centres, 2 municipalities, and the rest are construction companies and SMEs. Cluster is labelled with bronze label for cluster excellence. The main area of interest are: circularity and digitalization in construction sector, energy efficiency, solar energy, water and waste water management, R&D, innovation and education in the scope of new materials, and introduction of EU standards in building quality assessment.
